3 Ibid I think that it
know on what data
the contemplated repayment
of the loan in 15 years
is based

4 The municipal share of the
loan is Rs 25,000 and
in order to be able to repay
this in 15 years, there must
be an annual sinking
fund of about Rs 1,600

5 Further the municipality
will have to bear the
annual maintenance charges

6 The Director says that separate
steps will be taken in the
matter

Submitted to His Highness

30) In accordance with His Highness' orders on 10t November 1915 sanctioning the project for water supply to Chitaldrug town at a cost of about Rupees one lakh, the Deputy Commissioner of Chitaldrug was informed that the project would be undertaken only if the Government share of the outlay could be raised as a loan in the district

31) 2. The Deputy Commissioner has now forwarded for approval a draft prospectus for raising a loan of one lakh of rupees at a rate of 6 per cent interest which is to be guaranteed by Government to meet the Government and Municipal shares of the initial cost of the project by the issue of Debentures redeemable after a period of 15 years as he is of opinion that there are fair chances of raising the loan if the present season is taken advantage of He further states that the Municipal Council will revise their taxation or make other arrangements to discharge their share of the loan and to provide for the maintenance charges of the water works

32) 3 The Financial Secretary who was consulted regarding the terms of the prospectus is agreeable to the payment of interest at 6 per cent but considers that the term of repayment of the loan should be fixed at 40 years instead of 15 years as proposed by the Deputy Commissioner The Deputy Commissioner reports that the period of 15 years is fixed as the local people are unaccustomed to long term loans and a longer term than 15 years does not find favour with them

33) 4 The Council are of opinion that the draft prospectus and the draft order approving the same and requesting

requesting the Deputy Commissioner to take immediate action for augmenting the resources of the Municipality with a view to meet the maintenance and interest charges may be approved.

Rajo A+O

5. The draft prospectus and the draft order may be graciously approved.

connection with the guarantee it will be regarded as a loan to the Municipal Council on such interest as Govt may determine. It will always be open to Govt to require the Council to take such action as may be necessary in the direction of enhancement of taxation or as may be necessary to discharge their liabilities in respect of the debentures guaranteed and the Council must give effect to the suggestions of Govt

Govt without demur. It is on this understanding only that Govt sanction the issue of the prospectus."

43) The reasons for the addition is apparent. Otherwise it will be a Govt loan & not a municipal loan.

Deputy Commissione
C h i t a l d r u g.

R. Thyagaraja Iyer Esquire M.A.,
Secretary to the Government of
H. H the Maharaja of Mysore,
Revenue Department, Bangalore.

I have the honor to address you in connection with a
tory solution of the question of the water supply of the
of Chitaldrug, which has been causing a good deal of anxiety
number of years past

I enclose for the information of Government a copy of
andum prepared in September last which contains a summary
the previous history of this question and gives a fair idea of
present situation. Since the memorandum was drawn up, the rains
the latter portion of September up to now have brought in only
ry small supply of water to the Woddu, which may last for about
3 months, if used very sparingly The main tank has received
supply at all The regular water supply scheme is therefore
tically out of service and the town has to depend entirely
the subsidiary sources of supply like the Seenir Honda, Kamanabhavi
other wells. Fortunately the Seenir Honda was filled by the rains
the other wells also got more or less water I expect that these
ces of water supply will prove adequate during the next summer
and that there will be no acute difficulty for water similar to what
was experienced during the last summer As already stated the regular
piped water supply is almost entirely out of action and the small
tity of water in the Woddu which is now supplied to different
s of the town by turns and for a few hours every week, is not
able and is only suitable for minor domestic purposes

Received

General No. 249
No.

Enclosure No. 3.

Submitting proposals in connection with a satisfactory solution o the question of water to the Chitaldru town and requesting early orders on this reference.

During his visit to this District in September, the Dewan Saheb was pleased to make detailed enquiries into this subject and there was a consensus of opinion that the scheme which offered the most satisfactory solution of the difficulty was the Kalamahalu Kothrel scheme. This scheme is expected to cost about a lakh of rupees and in regard to the financial aspect of the project the Dewan Saheb was pleased to observe that Government would be prepared to consider with favor the free grant of ¾ths of the cost of the scheme, if the Municipality was prepared to meet ¼th of the cost As for immediate ways and means, he suggested that in view of the present financial stringency, a local loan of a lakh of rupees should be raised on the guarantee of Government A rate of 4½% was suggested and an effort was made informally to ascertain how far local capital would be forthcoming on this basis The response was not as adequate as could be wished though it was not discouraging There is reason to hope that the required amount can be raised in the District as a whole along with the contemplated Railway loan The response will be readier if the terms offered are somewhat more favorable I enclose herewith a copy of a letter from Mr Chakravarti, bearing on this subject It seems to me that in the case of this loan an interest of 6% would be very reasonable and prove attractive It may be a condition of the loan that the whole or any portion of it may be paid off at par at any time after 5 years at 6 months notice I enclose herewith a draft prospectus embodying these conditions and as soon as it is approved by Government I shall take steps to place the loan before the public and collect subscriptions

Separate steps will also be taken by the Municipality to revise its taxation so as to provide for the working expenses of the project and to meet the interest and sinking fund charges or the share of the loan

I have not formally placed these proposals before the Municipal Council, though they have been formulated and developed in close informal consultation with the Municipal Councillors I deem it advisable to defer formal discussion in the Municipal

35

Council until the main lines of the scheme are decided upon in a manner that will be acceptable both to Government and the Municipality.

If the proposals now made are found acceptable to Government I shall, on being apprised of that fact, place the scheme before the Municipal Council at its next meeting on the 30th instant and forward the resolution of the Council in due course.

I request the favor of very early orders on this subject so that the present comparatively favorable agricultural season may be taken advantage of to raise the loan and also that no time may be lost in providing an adequate and assured supply of water to this town

I have the honor to be,

S I R,

Your most obedient servant,

C S Balasundaram Jr

Deputy Commissioner,

Chitaldrug District

MEMORANDUM.

WATER SUPPLY OF THE CHITALDRUG TOWN.

Introductory:- Ever since I took charge of the District, I have been closely studying the question of the water supply of the Chitaldrug town and have visited most of the present and suggested sources of supply. During my visits to Kyatapur Vaddu, Bhimasamudra tank and Kathalal tank, the Executive Engineer Mr. N. Ram Rao accompanied me as well as Mr. N. G. Krishnaiengar, Assistant Engineer.

Present supply:- The present sources of supply to the town are two reservoirs which are situated about a couple of miles to the South of the town and known as the Thimmannanayakankere and Karevarthi Voddu just below it, the former being the main source and the latter an auxiliary source. Supply pipes have been laid from these reservoirs and supply is given at 68 street taps and 98 private house connections. The supply flows by gravitation and is not filtered. This scheme appears to have been designed by Sir Standish Lee and completed in the year 1901 at a cost of £ 33,286.

Defects of present sources of supply:- The main tank in the Thimmannanayakankere however did not fill ever since it was restored and during the past few years in particular the supply has been most precarious.

The tank which has a total depth of 23 feet received only 2 feet of water in 1910, 5 1/2 feet in 1911 and 6 feet in 1912 and practically nothing in 1913 and 1914. The tank has been absolutely dry since January 1914.

Various temporary expedients have been tried and small supplementary sources of supply drawn upon during this period of failure of the water supply.

(1) Some ponds, bandas and wells in various parts of town which had been greatly silted up were cleared o

36 A3

Such are the Santhohonda, the Soonirhonda, the well in the Soonirhonda and the Karmabhavi. Of these the water of the first two is chiefly used by the people for domestic purposes other than drinking and the water of the Karmabhavi is used for drinking also. Another chief source of drinking water is the draw well in the bed of the Soonirhonda. There are one or two other wells of minor importance which are used by some people.

I understand that in April and May last the situation had become extremely acute and the whole town had to depend only on the well in the Soonirhonda for drinking water and on the Santhohonda for all other purposes. For a few days in April 1915, an attempt was made to pump up water from the well in the Soonirhonda to cisterns erected near the town, but as the supply showed signs of failure the pumping was stopped and people were left to draw water in pots and buckets. I am told that several persons sent away their families from the town, that as much as 1 anna 4 pies used to be paid for a kerosine oil tinful(4 gallons) of water, that watermen used to earn about Rs 40-50 per month and that officials drawing Rs 30 and Rs 40 per mensem had to spend as much as Rs 10 a month for water.

Fortunately timely rains in the middle of May relieved the situation and brought water to the Karmabhavi, the Soonirhonda and other wells. A certain amount of percolation water also collected in a pond in the Karvarthi Voddu and this was and is still being pumped into the town distribution system and supplied to sections of the town by turns. This percolation water is now drying up and may give out in a fortnight or three weeks. Unless the rains of the North-East Monsoon are copious and give a supply to the tank and Voddu, the town will have to depend entirely on less than half a dozen wells and ponds for the supply of water for all purposes.

An anxious future:- I am told that last year about this time there was fairly large quantity of water in the Santhebennda and that of comparatively speaking we are worse off this year than during this period last year. Therefore if the North-East Monsoon this year should not bring water to the tank, the state of things from about January next will, I am afraid, be extremely serious and what it will be in March, April & May during the height of the summer, one can hardly imagine.

It is absolutely necessary that action should be taken and taken without loss of time to find an assured supply of water to the town. No boon would be more heartily welcomed by the people and would make the genuine gratitude of the people of this town in a greater degree than the satisfaction of this primary want.

Schemes suggested:- The following schemes have been suggested at one time or other for the water supply:-

(1) Katrahal tank scheme.
(2) Bhimasamudra tank scheme.
(3) Kyasapur Voddu scheme
(4) Ankli Mutt valley scheme.

The first three are closely related to one another as they all propose to get the supply from the Jinigi halla valley and each would cost about a lac of rupees. The 4th is to sink some wells in a sandy nallah that flows to the West of the Chitaldrug hills and pump the water. This is expected to be cheap to cost Rs 20000 to Rs 30000 - but a certain amount of experimentation would be necessary before an exact idea can be formed as to the certainty of the supply.

Bhimasamudra Tank Scheme:- As regards the first three schemes the Bhimasamudra tank is a big tank lying almost at the head of the Jinigi-halla. The tank has a capacity of nearly 3468 units and irrigates over 2000 acres of land. The tank fills rarely

Even allowing water for this area, there is a large margin of supply which may be safely utilised for the water supply of the town without any apprehension of trouble to vested interests. The tank has not been known to dry though it discharges only rarely.

The scheme appears to have been examined in some detail by Mr. V. Ranganathanger in 1911, who estimated the cost at Rs 72000 and the working expenses at Rs 4750. The scheme was also recommended to the Municipality by the then Chief Engineer (now Down).

Only satisfactory solution:- It seems to me that all things considered, the only satisfactory solution to the problem of the water supply is the Katrahni scheme. This must be pushed through to completion whatever sacrifice it may entail.

F I N A N C E:- We have next to consider how the scheme can be financed.

The rough estimate of cost is Rs 73000 but with increased prices &c., perhaps a lakh would not be far wrong.

The Chitaldrug Municipality has no accumulated surplus to draw upon to find any portion of this amount. The town is not a place of any appreciable commercial or industrial activity, though it is hoped that with the advent of the projected railway there will be some more life and activity The Municipal resources - present and prospective - are too meagre to allow of a loan of the whole amount or even of half the amount being taken. The working expenses are estimated at about Rs 5000 and if the Municipality can improve its resources to find this amount it will have accomplished a great deal.

The Municipality has therefore no alternative but to appeal to the mercy of the Government and beg that the initial cost of the scheme should be given as an extra-ordinary State grant.

In April 1912 Government were kind enough to hold out some hope of such a gift if the Municipality could [illegible]

Even allowing water for this area there is a large margin of supply which may be safely utilised for the water supply of the town without any apprehension of trouble to vested interests. The tank has not been known to dry though it discharges only rarely.

The scheme appears to have been examined in some detail by Mr. V. Rangaramiengar in 1911, who estimated the cost at Rs 72000 and the working expenses at Rs 4750. The scheme was also recommended to the Municipality by the then Chief Engineer (now Dewan).

Only satisfactory solution:- It seems to me that all things considered, the only satisfactory solution to the problem of the water supply is the Katrahal scheme. This must be pushed through to completion whatever sacrifice it may entail.

F I N A N C E:- We have next to consider how the scheme can be financed.

The rough estimate of cost is £ 73000 but with increased prices &c. perhaps a lakh would not be far wrong.

The Chitaldrug Municipality has no accumulated surplus to draw upon to find any portion of this amount. The town is not a place of any appreciable commercial or industrial activity, though it is hoped that with the advent of the projected railway there will be some more life and activity The Municipal resources - present and prospective - are too meagre to allow of a loan of the whole amount or even of half the amount being taken. The working expenses are estimated at about £ 5000 and if the Municipality can improve its resources to find this amount it will have accomplished a great deal.

The Municipality has therefore no alternative but to appeal to the purse of the Government and beg that the initial cost of the scheme should be given as an extra-ordinary State grant.

In April 1912 Government were kind enough to hold out some hope of such a gift if the Municipality could find

the annual maintenance charges. The suggestion was eagerly and gratefully accepted by the Municipality. But to the misfortune of the Municipality, Government changed their mind a year later and enquired whether the Municipality could raise half the capital cost, Government giving a grant of the other half. The Municipality had regretfully to express its inability to finance a loan of Rs 36000 in addition to finding the maintenance charges, and the whole correspondence then branched off to certain side issues which had been raised.

I would strongly urge on the consideration of Government the great need of this town and pray that the capital cost of the scheme be met from State funds. The Municipality will take immediate measures to develop its resources and provide funds for maintenance and working.

Front Temporary Measures.- A subsidiary but ~~&~~ none the less important matter that requires consideration is as to what should be done to provide temporary sources of water supply, until the final scheme is an accomplished fact. Under existing conditions, it will perhaps be difficult to get steel pipes and other material for the scheme and even if they can be got there may be considerable delay in delivery owing to shipping difficulties &c.,

If the coming North-East Monsoon fills the Thimmanna-nayakanaro, ~~&c~~ there will be no anxiety for a year or two, by which time the Katrahal scheme might be ready, but if the rains fail -. To be prepared for such a contingency, it seems to me that between now and December we should sink an additional well in the bed of the Soonir Honda and perhaps a well in the Ankli Mutt valley. The capacity of the Soonirhonda may be increased by cleaning it of some more silt and a conduit may be made from it to the Kanthohonda, so that the latter may be filled if the rains bring in any large quantity of water to the Soonir honda, if not to the Thimmannanayakankoro. Some wells in the outskirts of the

town should be also be deepened. Finally arrangements should be made to pump up water from the Gopalaswamy Konda on the hill. It is estimated that this konda contains at least 3 or 4 months supply for the town and this will have to be utilised as a last resource. For pumping from this konda, a portable engine is absolutely necessary as it is impossible to transport the ordinary heavy oil engine to the site of the konda. One of the engines in the Industries and Commerce Department may be lent if possible or if that is not possible, one should be bought. Later on the engine may be useful in sinking wells from District Funds and may be transferred to that Department.

For these temporary items of work, the Municipality would be grateful if the Government would make a lump grant of about Rs 6000 in lieu of the annual grant for 5 years referred to in para 3 of the Secretary's letter dated 15th May 1913.

SUMMARY:-

(1) Present supply is extremely unsatisfactory and future very anxious.

(2) Katrakal tank scheme is the only satisfactory solution.

(3) Government should make a free grant of the capital cost and the Municipality will provide maintenance and working charges.

(4) For temporary arrangements a Government grant of Rs 6000 is necessary. sd

Encl to Govt 9314-21,

D. O. letter dated 12th November 1915 from the Comptroller in Mysore, to the Deputy Commissioner Chitaldrug District.

Your D. O. No. 321 of the 3rd instant in regard to the rate of interest on loans to be raised in your District for Chitaldrug Railways and water supply. I am personally of opinion that in the present condition of the money market, it will be quite fair to offer a rate of 6% for loans to be raised by local bodies on Government guarantee. To take advantage of possible reductions in the rate of interest after the war conditions cease to exist, option should be reserved to repay the loan at the discretion of the local body concerned at the end of 5 years. Sanction of Government will have to be obtained to modify the terms on which they are prepared to consider offers for the construction of branch lines of railway according to their notification No.Fl.4932-8/G.F. 163-13-1 dated ??nd April 1914. Personally I am not in favor of a system of distribution of profits to debenture holders. It is not necessary when the rate of interest is so favorable. But if your local bodies should decide to distribute half profits as you contemplate in the case of Railway loans there will be no difficulty to an arrangement like the one referred to at the end of your letter.

Memorandum

CHITALDRUG ~~WATER WORKS~~ PROSPECTUS.

Sanctioned by Government in their order No. 5243-4 dated 18/12/26 Lud 9314-26

The Government of His Highness the Maharaja of Mysore have in their order No. 4 Ud-4 dated 3rd Jan. 1927 given their approval to a scheme for supplying water to the Chitaldrug town from the Kathral tank and have directed the D.C.W to arrange for the preparation of a detailed project.

2. The capital cost of the scheme is roughly estimated at one lakh of rupees. The Government have directed that the project should be financed by a loan to be raised by the Chitaldrug Municipal Council under a Government Guarantee in the town and District of Chitaldrug and have authorised the Deputy Commissioner and President of the Chitaldrug Municipality to issue the necessary prospectus and raise a loan of one lakh of rupees towards the cost of the project. The prospectus is accordingly issued with the approval and under the authority of the Government of His Highness the Maharaja of Mysore.

The loan will be raised on the following conditions -

1. The loan will bear interest at 6% per annum payable half yearly on the 31st December and 30th June.
2. The loan will run for a period of 15 years and will then be repayable at par.
3. The repayment of the loan and the payment of interest are both guaranteed by Government.
4. The Government and the Chitaldrug Municipality reserve to themselves the option to pay off the whole or any portion of the loan at par at any time after 5 years after giving a previous notice of 6 months to the debenture holders by publication in the Gazette.

3. Debentures of the marginally noted descriptions to the value of one lakh of rupees are now open for subscription by the ~~Rs 25 & Rs 100~~ public including such local bodies in the District as may decide to invest in the same and application for ~~sh~~ on in the prescribed printed form hereto annexed together with the 1st instalment of not less than 12½% of the amount applied for in the case of shares of the value of Rs 100 and Rs

52

L.C.

98

in the case of shares of the value of Rs 25 ~~and 1½ Rs in the case of shares of the value of Rs 6¼~~ may be presented at any Government Treasury in the District. The balance will be called up in instalments of not less than the amount specified above spread over one years at least one month's notice being given before each call.

4. A discount of 1% will be allowed on all debentures paid up in full on or before the 31st March 1916, on account of all debentures subscribed for by that date

Chitaldrug.

Chitaldrug

Sir,

With reference to the correspondence ending with your letter No. 417 dated the 20th Feby 1916 in the matter of effecting certain alterations in the draft prospectus for raising a loan for financing the Chitaldrug water Supply Scheme and to publication in the Gazette.

mm

57

I am directed to
state that the draft-
prospectus as already
approved by Govt may
be caused to be published
both in English and in Kannada
in Part II of the Mysore Gazette,
and the question of amending it
~~as suggested by you~~, taken up
if the response of the public is found discouraging
~~should be discouraging~~.

I am therefore to request
that arrangements may
be made with the Compiler Mysore Gazettes, direct
~~and the Superintendent Govt Press~~
for the publication of the prospectus *List of enclosures*
and to supply the required
nos of spare copies the cost
of printing the latter being charged to municipal funds.
The Compiler has also been instructed to take effect-
ive steps
